 Joint Federal Pharmacy Seminar

Washington, DC ★ October 30–November 2, 2016

Gaylord National Hotel
And Convention Center
Washington, DC
APhA Salutes You!

The American Pharmacists Association (APhA) invites all federal pharmacists to join our community of 63,000+ members. Visit us at the Annapolis Registration Desk to learn more about a special 15-months-for-the-cost-of-12 offer for new members!

You will receive a special membership gift on site when you join!
Exhibit Hall Opening—Meet Your Industry Partners
Sunday, October 30
1800–2000
Prince George’s Exhibit Hall AB
Lions, and Tigers and Bears—oh my! Follow the yellow brick road with Dorothy, Lion, Scarecrow and Tin Man as they travel to see the Wizard of Oz during the Exhibit Hall Opening. Take a trip to the Emerald City while you visit with our valued supporters to see the latest and greatest in products and services for federal pharmacy! Complimentary food and refreshments are served. A cash bar is also available. Dress for the reception is business casual. Your badge is required for entrance.

Signature Event: Collaborating for a Brighter Future
Monday, October 31
1730–1900
Gaylord Pier
Keeping in the spirit of meeting along the Potomac, join us outside on The Pier to gather with your colleagues for lively discussion prior to your evening’s activities. The event will feature light cuisine, musical entertainment, and beverages.

Realizing tonight is Halloween, and that you might be missing your ghosts and goblins back at home, we invite you to send a Halloween greeting home via a complimentary photo postcard. Look for the selfie stick at the Signature Event.

Dress for the evening is business casual — be sure to bring a jacket as the event will be outdoors. Your badge is required for entrance.
Supported by ScriptPro.

Closing Reception and Awards (or Service) Program
Wednesday, November 2
Woodrow Wilson Ballroom BCD
Reception: 1730–1830
Awards (or Service) Program: 1830–2000
Join your colleagues for the celebration of excellence. The evening will include a joint reception followed by the awards (or service) program. Dress for the evening is service or business attire.
- Ralph D. Arnold Awards Program (USA), Baltimore 1-2
- Lamar Smith Awards Program (USN), Baltimore 3-4
- Jerry W. Ross Awards Program (USAF), Annapolis 3-4
- USPHS Pharmacy Update and Coast Guard Recognition, Baltimore 5
Supported by Parata Systems and GSL Solutions.

American Pharmacists Association Membership Information, Annapolis Registration Desk

APhA salutes federal pharmacists and technicians! APhA recognizes federal pharmacists and technicians by offering a discount on membership dues, plus you’ll receive 15 months of membership for the cost of 12 if you join as a new member at JFPS. Join or renew your membership and receive a free commemorative ceramic tile and other gifts. Stop by for more details on APhA—the leader in providing professional information, education, and advocacy for pharmacists in all practice settings. Membership Information hours are:

Badges and Tickets

Please wear your name badge at all times during the seminar. Your badge serves as your passport to JFPS 2016 activities. Attendees without an official badge will not be admitted.

Registration is required for all social events. Social events are included with attendee, guest, and exhibitor registrations. Non-registered guests may register for social events at the Registration Desk. Lost badges will incur a $15 badge replacement fee.

Business Center

The FedEx Office Print and Ship Center is open 0600-2100 daily. Self-serve Internet access, copying, printing, and faxing are available 24/7.

Cyber Café

The Cyber Café, located at the Woodrow Wilson Registration Desk, offers complimentary access to the Internet so you can check email, download the latest JFPS 2016 schedule, link to exhibitor sites, and record CPE.

Emergencies and First Aid

To report an emergency, dial 333 from any house phone or call 301-965-4500. Do not dial 911. The APhA Office is located in the Ft. Washington Board Room.

Hotel Information

A representative from the JFPS Housing Office, Expovision, is available 24/7 at 703-770-3940. For general hotel assistance, refer directly to the Gaylord National front desk.

Internet Access

Complimentary Internet is available in the meeting and exhibit areas:

- **Network name:** JFPS 2016
- **Username:** federal
- **Password:** 2016

Supported by Genentech.

Lost and Found

The APhA Registration Desk will serve as the central Lost and Found collection area. Inquiries may also be directed to 484-467-8794.

No Cover/No Salute

The Gaylord National campus has been deemed “No Cover/No Salute Required.” Therefore, all attendees in uniform are not required to wear head gear, cover, or hat and a salute is not required. However, attendees in uniform who leave the Gaylord National campus are required to wear the appropriate head gear and render a salute when protocol would require such military courtesy.

Service Message Boards

Army, Navy, Air Force, Department of Veterans Affairs, and Public Health Service/Coast Guard.

Located in the Prince George’s B Foyer, Service Message Boards are available for your convenience. You may also schedule interviews at the Message Boards.

Smartphone App

The JFPS 2016 App contains the schedule, exhibitor list, session details, and more! Click on the smartphone icon at www.jfpsinfo.org.

Supported by Innovation.

Children

Please note that children under the age of 18 are not allowed in the education sessions or the Exposition, including the Opening Event in the Exhibit Hall. This includes children in strollers and carriers.

Alcoholic Beverage Policy

In keeping with pharmacy’s role as a health profession, JFPS de-emphasizes the consumption of alcohol. Please provide proper identification when required.

Community Service Project: Paws for Veterans

Paws for Veterans is a local organization providing psychiatric service dogs to veterans with PTSD. Donation bins will be available at the entrance to the General Session and Exhibit Hall. Please consider a generous contribution!

All continuing pharmacy education (CPE) participation will be recorded online for JFPS 2016. Recording credit online is quick and easy:

- You may record your CPE credit at the Cyber Café during the meeting or online at www.jfpsinfo.org after the meeting until December 2, 2016, 1700 EST.
- You need your pharmacist.com username and password. Your username was provided to you with your conference registration badge.

From the Cyber Café
1. Click on CPE Icon.
2. Log in using your pharmacist.com username and password.
3. Enter the attendance code(s) and select “Submit.”
4. Click the “Claim Credit” button (located in the “Your Sessions” section).
5. Click the “Evaluation” button.
6. Complete the session and speaker evaluations.
7. Click the “Claim Credit” button.
8. Select the appropriate credits.
9. Enter your 6-digit NABP e-Profile ID, the month and day of your birth and check “yes” to verify accuracy and click “Claim.” Allow 3 hours for NABP number activation if you have just requested one.
10. CPE credits will automatically be transferred to CPE Monitor, although they may not post to your CPE Monitor transcript immediately.
11. Your Pharmacist.com “My Training” page maintains a list of your enrolled and completed conferences; however, you will be linked back to CPE Monitor for proof of your CPE credit.

From Another Computer
2. Click the “Education” link and select “Continuing Pharmacy Education.”
3. Log in with your pharmacist.com username and password.
4. Follow steps 3-11 in the adjacent column.

For Assistance
- If you need your username and password, contact infocenter@aphanet.org or phone 1-800-237-APhA, press #2.
- If you cannot locate a specific attendance code or have general questions, please email a request to the APhA Education Department at education@aphanet.org.

CPE participation must be recorded by December 2, 2016, 1700 EST.
Depending on their organization or branch of service, qualified attendees are able to earn up to 18 hours of continuing pharmacy education (CPE) credit. Sessions approved for CPE credits are indicated by an ACPE number and the number of CEUs in the Program Guide.

Accreditation
The American Pharmacists Association (APhA) is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education.

CPE Monitor
The CPE Monitor system became mandatory for all pharmacists, technicians, and CPE providers on January 1, 2013. If you have not obtained your NAPB e-profile ID, please go to http://www.nabp.net/programs/cpe-monitor/cpe-monitor-service. If you have any questions about this system or your number, contact NABP customer support at 847-391-4406, Monday–Friday between 0900 and 1700 CT.

International Pharmacists
International pharmacists may obtain CPE credit for their participation. Please contact eterry@aphanet.org for details.

Target Audience
JFPS 2016 education sessions are designed for federal pharmacists and pharmacy technicians.
• Courses appropriate for pharmacist participation are designated by an ACPE universal activity number ending in the letter “P.”
• Courses appropriate for pharmacy technician participation are designated by an ACPE universal activity number ending in the letter “T.” The number of credit hours is based on the amount of content applicable to pharmacy technicians. Please review the ACPE information for each session to determine the amount of credit offered.

Learning Objectives
Learning objectives for all CPE sessions are provided on the JFPS 2016 website, www.jfpsinfo.org, and are announced at the beginning of each session. To locate the learning objectives online, select the specific education session from the listing under the Education tab.

Disclosures
Faculty disclosures are provided on the online cover sheet for each session. The JFPS Planning Committee and APhA staff disclosures can be found on the meeting website, www.jfpsinfo.org.

CPE Requirements
To earn CPE credit for a session accredited by APhA, participants must actively participate in the entire session, submit an attendance code, complete a session evaluation, and claim credit using the online CPE submission site. Proof of your CPE credit will be available to you on CPE Monitor. APhA will no longer issue Statements of Credit. See page 6 for more information and instructions.

State Requirements
Check with the Board of Pharmacy in your state regarding specific CPE requirements.

Florida-licensed pharmacists: To ensure that your continuing pharmacy education participation can be filed with the state-mandated CE Broker system, please make sure you have provided APhA with your Florida license number. To check, log on to www.pharmacist.com and select Your Account, then License Information.

Grievance Policy
Should any attendee of an approved CPE session be dissatisfied with the quality of the activity, a request in writing must be submitted to the APhA Education Department at education@aphanet.org within five days of the conclusion of the session.

Learning Levels
To help you more efficiently plan your time, the content of the education sessions is categorized into two levels of expertise:
• Level 1: Baseline knowledge of the subject area is required. The information presented will be a primer on the topic and appropriate for a wide range of pharmacists and pharmacy technicians.
• Level 2: Experience with the topic is recommended, but advanced expertise or specialty practice in the subject area is not necessary. These educational offerings will focus on expanding the learner’s knowledge and application of the new and/or more complex information.

Activity Types
Activity types are designed to give attendees an idea of the intended outcome of a continuing pharmacy education (CPE) activity.
• Knowledge-based activities are designed to enhance or add to pharmacists’ or technicians’ knowledge of a topic; mostly didactic sessions.
• Application-based activities provide pharmacists and technicians with opportunities to apply their knowledge, usually through case studies or other application activities.
• Practice-based activities are longer, more comprehensive activities of at least 15 hours that incorporate knowledge, skills, and performance. These activities are also known as certificate training programs.
Sunday, October 30

Certificate Training Programs
The Pharmacist and Patient-Centered Diabetes Care Certificate Training Program (Pre-registration required)

0730–1700
Annapolis 1-2
Level 1
Activity Type: Practice-based
ACPE# 0202-0000-14-166-L04-P
0.8 CEUs

The Pharmacist and Patient-Centered Diabetes Care Certificate Training Program is an intensive educational experience designed to equip pharmacists with the knowledge, skills, and confidence needed to provide effective, evidence-based diabetes care. Five self-study modules provide comprehensive instruction in current diabetes concepts and standards of care. The live seminar incorporates case studies and hands-on skills training focused on the situations most likely to be encountered—as well as the services most needed—in community and ambulatory care practice settings. Participants will gain experience evaluating and adjusting drug therapy regimens for patients with type 1 and type 2 diabetes, counseling patients about lifestyle interventions, analyzing and interpreting self-monitoring of blood glucose results, and assessing the overall health status of patients to identify needed monitoring and interventions.

Speaker(s): Jonathan G. Marquess, PharmD, CDE, FAPhA, The Institute for Wellness and Education, Inc.; Staci-Marie Norman, PharmD, CDE, Martin’s Pharmacy

Finding Work-Life Balance to Reduce Stress and Optimize Delivery of Pharmacists’ Professional Services

1500–1630
Annapolis 4
Level 1
Activity Type: Knowledge-based
ACPE# 0202-0000-16-189-L04-P
ACPE# 0202-0000-16-189-L04-T
0.15 CEUs

When work and family demands conflict with one another, this can lead to stress, resulting in negative impacts on psychological and physical health, work performance, and overall quality of life. Studies show that stressed health care professionals suffering from fatigue, depression, and/or anxiety, often perform suboptimally, which can contribute to lower-quality patient care and increased risk of medical errors.

This session invites a panel of senior leaders from the U.S. Public Health Service (USPHS) and supporting family
members to discuss work–life conflict scenarios and successful strategies for managing and balancing everyday demands to reduce stress. With basic work–life balance knowledge and techniques, pharmacists can reduce the stresses of work and life demands to provide ideal professional services, achieve their personal best, and optimize patient care.

**Speaker(s):** CDR Kavita Dada USPHS; CDR Eunice Chung-Davies USPHS; LCDR Lena Choe USPHS; CDR Elaine Cunningham USPHS; CAPT Peter Diak USPHS; CDR Ida-Lina Diak USPHS; CAPT Richardae Araojo USPHS; CDR David Araojo USPHS; Amy Graves; CAPT Sara Newman USPHS; CDR Adora Ndu

**ACPE# 0202-0000-16-151-L04-P**  
**ACPE# 0202-0000-16-151-L04-T**  
0.2 CEUs

Readiness is the center of the Military Health System (MHS) Quadruple Aim. It is not practiced every day in garrison by pharmacists and technicians, so it must be continuously trained to ensure deployment readiness. Subject matter experts will present information critical to preparation for deployment and safe and effective deployed pharmacy operations. The speakers will cover deployment topics including aseptic technique, narcotic control, and emergency/mass casualty response. The focus of the presentation will be to educate attendees on how to stay current on their readiness skills while in garrison and be prepared for their next deployment. The education will include the rolling out of new Readiness Skills Verification (RSV) instruction tools and updates to the RSV standards.

**Speaker(s):** Maj Anthony Dargush USAF BSC; TSgt Stephen Iles USAF

Leadership Through Service in Federal Pharmacy
Level 1
Activity Type: Knowledge-based
ACPE# 0202-0000-16-164-L04-P
ACPE# 0202-0000-16-164-L04-T
0.15 CEUs
The Joint Federal Pharmacy Seminar (JFPS) is an opportunity for federal pharmacy senior leaders to personally update meeting attendees about significant strategic initiatives for all branches of the Armed Forces, the Department of Veterans Affairs, and the Public Health Service. This session will provide an educational venue for pharmacists and pharmacy technicians to hear directly from their chief pharmacy officers on current key issues and future plans that affect their individual organizations and how these issues/plans impact their local pharmacy operations and patient care services. During this session, federal pharmacists and pharmacy technicians will be informed about strategic goals, joint and service-specific initiatives, policies, and performance measures applicable to their pharmacy practice.
Speaker(s): COL John Spain MS USA; George Jones, PharmD, Defense Health Agency; CAPT Thinh Ha MSC USN; Col Melissa Howard USAF BSC; CDR Aaron Middlekauff USCG; Ronald Nosek, MS, FASHP, Dept. of Veterans Affairs; RADM Pamela Schweitzer USPHS

1030–1130
Preparing for the Department of Defense’s New Electronic Health Record: MHS GENESIS
Level 1
Activity Type: Knowledge-based
ACPE# 0202-0000-16-177-L04-P
ACPE# 0202-0000-16-177-L04-T
0.1 CEUs
In 2015, the Department of Defense (DoD) contracted with a multivendor team led by Leidos to replace the aging Military Health System (MHS) electronic health record (EHR). Leidos’s EHR partner, Cerner, was tasked with providing DoD with a commercial off-the-shelf solution to replace the Composite Health Care System (CHCS), the Armed Forces Health Longitudinal Technology Application (AHLTA), and Essentris. The replacement system will provide both an inpatient and outpatient pharmacy module and will include such new technologies for DoD as inventory management, barcode medication administration (BCMA), and the electronic prescribing of controlled substances. This session will discuss federal program goals, initiatives, and the current and future state of the MHS EHR modernization project, known as MHS GENESIS.
Speaker(s): CDR David Hardy MSC USN; CDR Traci Hindman MSC USN; CAPT Kyle Nebelsick MS USA; MSgt Jason Christianson USAF

Health care is changing rapidly in many ways. Advancements in technology, changes in legislation, patient demands for accountability and access, and increasing recognition that all members of the health care team must be integrated into patient care are all key drivers of change. There is wide variation in the degree and scope of clinical pharmacy services across federal health care facilities. The pharmacy profession needs to continue building its patient-centered role and capitalize on the positive impact that clinical pharmacy services and programs have had on patient outcomes. The federal sector has always held a strong leadership position in its innovative approaches to change, and now is the time to accelerate those innovations and leadership. This program will focus on strategies being utilized throughout the Department of Veterans Affairs (VA) to transform practices and align our rapidly changing world with the practice vision of the future. This session will focus on current gaps in care for our veterans and how VA is leveraging the use of clinical pharmacy specialists to improve access, utilization of telehealth technologies to ensure all patients have access to services, and ensuring patients are taking the right medications through enhancements in medication reconciliation processes.

**Speakers:** Michael Tran, PharmD, BCPS, VA Great Lakes Health Care System; COL Mitch Nazario USAF MS; Cynthia Gutierrez, PharmD, MS, BCPP, VA Mental Health; Eric Spahn, PharmD, Department of Veteran Affairs; Dana Frank, PharmD, CGP, Department of Veterans Affairs

The health care services environment has experienced significant changes due to health care reform measures and patient care quality improvement initiatives—at both the state and national level. The advent of provider status recognition offers additional opportunities for pharmacists to serve in more advanced patient care roles. As the role of the pharmacist advances, there must be a focus on how the clinical pharmacy specialist (CPS) may be better utilized in all practice settings to function at the top of their licensure and scope of practice. This session will address issues specific to the expanded roles of the CPS in existing and emerging areas of practice.

Pain affects more Americans than diabetes, heart disease, and cancer combined. Of those patients presenting to physician offices with noncancer pain symptoms or pain-related diagnoses, an estimated 20% receive an opioid prescription. Between 2007 and 2012, opioid prescriptions per capita increased 7.3%, with sales of opioid pain medication and opioid-related overdose deaths increasing in parallel. From 1999 to 2014, more than 165,000 Americans died from overdose related to opioid pain medication. In an effort to address the opioid epidemic, the Centers for Disease Control and Prevention (CDC) developed the 2016 Guideline for Prescribing Opioids for Chronic Pain. Similarly, the Department of Veterans Affairs (VA) is undertaking an Opioid Safety Initiative and will soon publish, with DoD, an updated VA/DoD Guideline for Chronic Opioid Use. This session will discuss the epidemiology of opioid use and abuse in the U.S., review the CDC Guideline for Prescribing Opioids for Chronic Pain and the VA pain-related initiatives, and describe opioid risk assessment and stratification tools for use in patients on chronic opioid therapy.

Speaker(s): Mitchell Nazario, PharmD, CPE, West Palm Beach VA Medical Center

Implementing Patient-Centered Care Medication Synchronization: Is It Time to Offer This Program?
1400–1500
Annapolis 3-4
Level 1
Activity Type: Knowledge-based
ACPE# 0202-0000-16-167-L04-P
ACPE# 0202-0000-16-167-L04-T
0.1 CEUs
The treatment of chronic illnesses is a major driver of rising health care costs, and—for many people—medications are the most cost-effective treatment. Sadly, patients often miss doses, fail to refill prescriptions on time, and even stop taking their medications without consulting a health care professional. In November 2014, the Pawhuska Indian Health Center Pharmacy leveraged its relationship with patients to improve adherence and provide quality care by developing and implementing a Medication Synchronization Appointment-based Model—the first of its kind for the Indian Health Service (IHS). The program is designed to provide patients a service that allows them to obtain their ongoing prescription refills at the same time on a day convenient to them. This pharmacist-driven service eliminates the need for patients to request refills, enhances pharmacist-patient dialogue, and ensures that all prescriptions are in the hands of patients before they deplete their current medication supply. This session will discuss the medication synchronization program at the Wah-Zha-Zhi Health Center Pharmacy.

The Defense Logistics Agency continuously works toward providing an efficient and responsive acquisition system that helps its customers buy medications strategically and cost effectively. Through the Defense Medical Logistics Standard Support (DMLSS) program, DoD is able to bring electronic commerce to health care operations so that pharmacists and pharmacy technicians can easily navigate an electronic data interchange to research products, place orders, pay bills, and manage inventory. This session will focus on DoD cost savings initiatives and how to use DMLSS to leverage the strategic sourcing capability and pricing agreements to maximize cost avoidance.

Direct Oral Anticoagulants: What Is Their Role in Patient Care?

1515–1615
Annapolis 3-4
Level 2
Activity Type: Application-based
ACPE# 0202-0000-16-160-L01-P
ACPE# 0202-0000-16-160-L01-T
0.1 CEUs

Direct oral anticoagulants (DOACs) have major pros and cons. Benefits of DOACs are their major pharmacologic advantages over vitamin K antagonists (e.g., warfarin), including rapid onset/offset of action, predictable pharmacokinetics, and elimination of the requirement for regular coagulation monitoring. Disadvantages of DOACs include concerns about medication adherence without laboratory monitoring; uncertainty about dosing in some populations (e.g., patients with renal dysfunction, advanced age, or obesity); higher drug costs compared with warfarin; lack of specific antidotes; and absence of assays to measure drug levels at most centers.

Speaker(s): MAJ Victoria O'Shea MS USA

Pharmacy Business Operations, Management, and Professional Leadership

Introduction to USP General Chapter <800>—How Will It Affect Federal Pharmacy?

1515–1615
Annapolis 1-2
Level 1
Activity Type: Knowledge-based
ACPE# 0202-0000-16-181-L04-P
ACPE# 0202-0000-16-181-L04-T
0.1 CEUs

USP General Chapter <800> introduces new, enforceable standards for the handling of hazardous drugs (HDs) in the health care setting. The elements of this chapter introduce standardized methods for protecting health care workers from HDs by requiring specific engineering controls, standard operating procedures, and monitoring requirements that have not been previously enforced. The standards will take effect July 1, 2018, and facilities will need to begin planning now in order to implement the elements of this chapter by the deadline. This session will provide pharmacists and pharmacy technicians with essential information about the standards and the many requirements they entail.

Speaker(s): CPT Seth Mayer MS USA; MAJ Jonathan Bartlett MS USA

Implementing Patient-Centered Care

The Role of the Clinical Pharmacy Technician

1515–1615
Baltimore 1-2
Level 1
Activity Type: Knowledge-based
ACPE# 0202-0000-16-148-L05-P
ACPE# 0202-0000-16-148-L05-T
0.1 CEUs

The role of the clinical pharmacy technician, as a clinical pharmacist extender, is novel and expanding. Building on basic pharmacy technician skills, a clinical pharmacy technician performs functions ranging from administrative tasks to direct patient care to data management. The Army is taking steps to solidify the important contributions of clinical pharmacy technicians by creating a standardized position description and adding a clinical pharmacy technician fact sheet and competency-based orientation to the Army Medical Home Roles and Responsibilities Reference Manual. This session will focus on the role, responsibilities, and contributions of clinical pharmacy technicians in the Army Medical Home.

Speaker(s): Suzanne Phillips, PharmD, BCPS, MPH, PhD, Evans Community Hospital; Jennifer Evans, PharmD, Kimbrough Ambulatory Care Center

Pharmacy Business Operations, Management, and Professional Leadership

A Positive Patient Safety Culture as a Path to High Reliability

1630–1730
Annapolis 1-2
Level 1
Activity Type: Knowledge-based
ACPE# 0202-0000-16-148-L05-P
ACPE# 0202-0000-16-148-L05-T
0.1 CEUs

Since the release of the Institute of Medicine’s 1999 report “To Err is Human,” health care systems have struggled to develop and implement effective strategies for promoting a culture of patient safety and improving outcomes of care. While technology has contributed to rapid advancements in health care delivery, and adding pharmacists to the medical home team has resulted in safer and better quality care, a negative safety culture across the industry continuum acts as a barrier to transforming the health care system into a highly reliable organization. This session will discuss advancements in and barriers to achieving a positive patient safety culture, including the importance of human factors engineering and improvements in communication. Several decision support tools will be provided to model a positive patient safety culture.

Speaker(s): Bruce McIntosh, PharmD, VA National Center For Patient Safety
Pharmacy Business Operations, Management, and Professional Leadership

Department of Defense Technology Update
1630–1730
Annapolis 3-4
Level 1
Activity Type: Knowledge-based
ACPE# 0202-0000-16-159-L04-P
ACPE# 0202-0000-16-159-L04-T
0.1 CEUs

Technology is an imperative adjunct to pharmacy practice. The Department of Defense (DoD) pharmacy community relies on integrated automation, workflow systems, automated medication dispensing machines, will-call systems, and queuing systems to properly function as a pharmacy unit. Furthermore, pharmacy personnel must be aware of emerging technologies available to them in the form of e-prescribing, pharmacy mobile applications, and changes within the future electronic health record. This technology is constantly evolving, and it is essential that pharmacy personnel are educated on these changes and future initiatives. This session will discuss federal program goals, initiatives, and the current and future state of technology in the field.

Clinical Patient Care
Managing Dyslipidemia: Evolving Roles of Nonstatins and Newer Drugs
1630–1730
Baltimore 1-2
Level 2
Activity Type: Application-based
ACPE# 0202-0000-16-160-L01-P
ACPE# 0202-0000-16-160-L01-T
0.1 CEUs

In 2013, the American College of Cardiology released new guidelines on the treatment of dyslipidemia. Recently, ACC also released an expert consensus statement discussing the role of nonstatin therapies. Untreated dyslipidemia increases the risk of cardiovascular disease by almost double. With more than 70 million American adults currently having elevated LDL cholesterol, appropriate treatment of dyslipidemia is critical. The role of statin therapy is firmly established; however, the role of nonstatin therapies and the new medication class, PCSK9 inhibitors, is not as clear, and the place in therapy of these agents is questionable. This session will provide attendees with data on nonstatin therapies and their potential role in therapy. In addition, the Joint Commission of Pharmacy Practitioners (JCPP) Pharmacists Patient Care Process will be discussed and applied to patient cases, with the goal of enhancing patient outcomes.

Many organizations are attuned to the need for performance metrics. Without a doubt, they are a key mechanism for analyzing health care effectiveness and quality. It is important to consider where pharmacy can add value to this model. This session will provide an introduction to measuring value in health care, including an overview of national organizations that promote metrics related to pharmacy. Aligning with your organization and engaging leadership are often keys to success when developing and implementing metrics at a facility level. Strategies for developing metrics where pharmacy can take an active role and creating accountability to achieve...
Implementing Patient-Centered Care

Additionally, a population-based example of pain management and the opioid safety initiative within the Veteran Affairs health care system will be presented.

Pharmacy Business Operations, Management, and Professional Leadership
DMLSS and Strategic Sourcing Capabilities: Practical Experience

This session discusses how to use Defense Medical Logistics Standard Support (DMLSS) to leverage the strategic sourcing capability and pricing agreements to maximize cost avoidance. This hands-on computer training will provide participants the opportunity to gain working experience with DMLSS, the strategic sourcing capability, and how to identify cost-effective product alternatives.

Speaker(s): Lcdr John Dischert MSC USN, Lcdr Ebenezer Aniagyei MSC USN, Maj Norman Tuula MS USA; Vurtis Cunningham, Joint Medical Logistics Functional Development Center; Richard Marion, Joint Medical Logistics Functional Development Center

Implementing Patient-Centered Care
Mental Health Clinical Pharmacy Specialists (MH CPSs) are meeting the demand for an increase in mental health professionals created as a result of the increased need for services and the decreased number of active psychiatrists in the U.S. Mental health CPSs are highly trained professionals with the knowledge and skills to provide quality mental health care. In the Department of Veterans Affairs (VA), MH CPSs are recognized providers who function at the top of their licensure and scope of practice in a variety of practice settings to meet the growing demand for providers for individuals with mental illness. This session will describe the expanding roles and impact of MH CPSs in the VA.

Speaker(s): Cynthia Gutierrez, PharmD, MS, BCPP, South Texas Veterans Health Care System

Clinical Patient Care
Respiratory Update: A Review of the Latest FDA-approved Inhalers for COPD and Asthma and How They Fit into the Current Guidelines

This session will provide an update of the latest FDA-approved inhalers for COPD and asthma. Their mechanisms of action remain the same as previously approved inhalers, so it is vital to explore where these new devices fit into the current guidelines and what specific patient circumstances would warrant their use. In this session, attendees will gain knowledge about these new inhalers, including mechanisms of action, device delivery systems, pharmacology, directions for usage, counseling information, and their place in therapy in relation to the current guidelines for COPD and asthma.

Pharmacists’ services have grown well beyond functions tied only to dispensing medications. Many pharmacists provide patient-centered services such as coordination of medications during care transitions, comprehensive medication reviews with ongoing medication monitoring, chronic disease management, education, prevention and wellness services. Pharmacists’ contributions as team members in the integrated care model are essential to improving the quality of care, cost effectiveness, and patient experience. This session will provide an update of the status of each country’s movement to provider status, national expectations of pharmacy services, the impact that future financing and delivery models have on pharmacy services and what pharmacists and technicians can do at the local level to prepare for changes in practice once legislation is approved.

Creating a tobacco-free nation is one of the top priorities of the U.S. Surgeon General. Smoking is still the leading cause of preventable death and disease in the U.S., yet an estimated 42 million adults continue to smoke. The good news is that more than two-thirds want to quit, with about one-half reporting that they have made a conscious effort to quit smoking in the previous year. This program will provide the health professional and clinical support staff with the ability to refer tobacco users to appropriate resources to enable them to quit.

Compounding is an integral part of pharmacy practice and essential to the provision of health care. This activity-based session will provide pharmacists and technicians with a strong foundation and skill set required to perform day-to-day activities involving the safe handling, management, and compounding of sterile and non-sterile medications. For non-sterile compounding, there will be a refresher on percentage preparation, as well as on conversion factors, with a focus on reducing or enlarging formulas. The sterile compounding portion will focus on I.V. product preparation using proper reference material and aseptic technique.

This interactive presentation will familiarize pharmacists and pharmacy technicians with recent changes in laws affecting the practice of pharmacy and examine various courts’ rulings in recent pharmacy cases. This session will first discuss the “corresponding responsibility” and “legitimate medical purpose” concepts found in U.S. Drug Enforcement Administration (DEA) regulations through the viewpoint of the case of *The Medicine Shoppe v. Loretta Lynch*. Then, the “wrongful conduct rule” and its applicability to barring a plaintiff’s claim will be explained. Third, a case will be presented examining how a pharmacist can be liable for the illegal activities of a pharmacy technician. Lastly, cases will be presented/discussed that center on the potential liability of pharmacists rounding with physicians, and the creation of a hostile work environment with retaliation.

Pharmacy today is fraught with new legislation and regulation. Constant developments in Congress and federal agencies have implications for pharmacists’ practices. This session will provide the most recent information on congressional activities addressing prescription drug abuse and misuse as well as other legislative efforts impacting the profession, such as provider status. On the regulatory front, speakers will describe federal agency efforts that address the safety, quality and security of medications to improve and enhance patient care.

The JFPS Contributed Papers Poster Program is designed to challenge federal practitioners and researchers by providing a forum to share practice information, disseminate research findings, and educate colleagues.

Conference registrants were invited to submit abstracts in four categories:

- Contributed Research Papers: Presenting findings of original research on issues relevant to practicing pharmacists and pharmacy technicians.
- Innovative Practice Reports: Presenting new ideas or strategies for the delivery of patient care or creative applications of existing techniques and services.
- Reports on Projects in Progress: Presenting research papers or innovative practice reports in initial stages of outcomes reporting.
- Encore Presentations: Presenting posters previously included at other local, state or national meetings.

Posters were accepted in four topic areas: Automation/Technology, Clinical Pharmacy, Hospital Inpatient Services, and Pharmacy Operations.

Most posters presented during JFPS 2016 are eligible for the poster awards program. Award plaques are for first place in each of the poster categories and overall best of seminar. Special recognition ribbons are awarded to the next highest scoring poster that did not win in its category. Awards are presented during the Closing General Session on Wednesday.

Posters are on display in Prince George’s Exhibit Hall A from Monday, October 31 at 0630 through Tuesday, November 1 at 1330.

Poster authors are available to discuss their poster research with attendees during the Meet the Researchers sessions on Monday, October 31 (odd numbers) or Tuesday, November 1 (even numbers) from 0630–0745. Each Meet the Researcher session will be accredited for 1 hour of CPE credit. Attendees must pick up a CPE form by 0730 in order to receive CPE.

Washington, DC 20037
zgreen@ptcb.org
www.ptcb.org

PTCB develops, maintains, promotes, and administers a nationally-accredited certification and recertification program for pharmacy technicians to enable the most effective support of pharmacists to advance patient safety.

Pharmacyclics, LLC – An AbbVie Company, Booth 128
995 E. Arques Avenue
Sunnyvale, CA 94085
Phone: 919-665-7180
bkeithley@pcyc.com
www.pcyc.com

Pharmacyclics LLC, a wholly-owned subsidiary of AbbVie (NYSE: ABBV), is focused on developing and commercializing innovative small-molecule drugs for the treatment of cancer and immune-mediated diseases. Pharmacyclics’ mission is to develop and commercialize novel therapies intended to improve quality of life, increase duration of life, and resolve serious unmet medical needs. Pharmacyclics markets IMBRUVICA.

Pickpoint of Maxor National Pharmacy, Booth 322
3149 Skyway Court
Fremont, CA 94539
Phone: 925-924-1700, ext. 370
todd@pickpoint.com
www.pickpoint.com

PickPoint has provided intelligent pharmacy solutions since February 2000. PickPoint’s intelepharmacy will call system (WCS) controls all verified prescriptions inside pharmacies—making them instantly available for handout, RTS, or answering patient questions—delivering all of the productivity associated with robotic automation at a fraction of the cost. PickPoint’s Intelepharmacy RDS is a force multiplier, allowing same standard of care prescription dispensing at remote points of care.

Purdue Pharma L.P., Booth 215
One Stamford Forum
Stamford, CT 06901

Presentation Theater sessions provide an opportunity to ask product-specific questions of key experts and industry representatives, find out information on new pharmaceutical products and services, and learn the latest in data and research findings. Space is limited—arrive early. Since the material presented may be promotional and may concentrate on a specific product, these sessions are not approved for CPE credit.

Monday, October 31

1145–1245  
*Prince George’s Exhibit Hall B*  
**Rethinking Approaches to COPD Management**  
Promotional non-CME program on the burden of COPD, COPD therapy guidelines, and a COPD maintenance medication option.  
**Speaker:** William Simonson, PharmD  
*Presented by Sunovion Pharmaceuticals Inc.*

1300–1400  
*Prince George’s Exhibit Hall B*  
**Jardiance (empagliflozin) Tablets**  
The presentation will cover key information regarding the mechanism of action, phase III clinical development program, efficacy, safety profile, and dosing for this therapy. Attendees have the opportunity to ask the faculty questions about the data presented.  
**Speaker:** Charles A. Reasner, II, MD, FACP, FACE, FRCP, University of Texas Health Science Center  
*Presented by Boehringer Ingelheim Pharmaceuticals, Inc.*

Tuesday, November 1

1145–1245  
*Prince George’s Exhibit Hall B*  
**Delivering What Matters: The Better Care, Lower Cost Pharmacy Experience**  
Pharmacies were created to provide beneficiaries with medication. But pharmacist Heather Sundar knows they can do much more. At its best, the practice of pharmacy safeguards beneficiaries’ health and protects their pocketbooks. It empowers pharmacists as vital members of the care team. It eliminates waste and saves money. Come hear her insights and learn proven benefits of home delivery combined with expert clinical care.  
**Speaker:** Heather Sundar, PharmD, Vice President of Customer, Clinical and Strategic Solutions, Express Scripts  
*Presented by Express Scripts.*

Wednesday, November 2

1200–1300  
*Annapolis 1-2*  
**Developments in Chronic Hepatitis C: Review of Clinical Data Supporting a Treatment Option**  
This presentation reviews clinical trial data in multiple patient types and discusses efficacy and safety in patients with complicating comorbidities.  
**Speaker:** Norbert Brau, MD  
*Presented by Merck & Co., Inc.*

1200–1300  
*Annapolis 3-4*  
**Impacting FEV₁ and HRQoL with Bronchodilators in COPD**  
An expert in COPD discusses the impact on lung function and health-related quality of life in COPD with bronchodilators. Attendees also learn about efficient drug delivery.  
**Speaker:** Dennis Doherty, MD, FCCP, University of Kentucky Medical Center  
*Presented by Boehringer Ingelheim Pharmaceuticals, Inc.*
THANK YOU TO OUR SUPPORTERS
